EXPERIENCE

AMAZON

UX Design Engineering Lead

2016 - Present | NYC

I lead the UX Engineering arm of the systems design team: responsible for the design of universal interaction patterns and experiences across all surfaces and applications. I create tools and full-stack software-based systems and experiences that enable Amazonians to create solutions for real-world needs.

I designed and developed the UX Engineering Platform; a hyper-efficient system which automates cross-functional collaboration while reducing technical debt and engineering costs for the UX organization to zero.
